Of all of the initial batch of Morse related petitions this one is the best of the group. It allows the US rules to be more in line
with the rest of the world while providing something to keep the
FISTS group and other Morse advocates happy. It would allow more
amateurs to upgrade using current technical standards while not
tying them to outmoded technology. It is a good petition and is
worth putting into effect. The testing requirements can be handled
by the Amateur community when they submit questions for inclusion
in the question pools and it leaves most of the testing structure
intact. It is the best compromise for the present time and as such
should be chosen for enactment.
